AMERICA'S FAVORITE TRUCK CAMPER + NORTH AMERICA'S LARGEST CAMPER MANUFACTURER | SINCE 1965

**Memories.** Tales told 'round the fire. Of people. Places. Things done. A summer's camping. Boating. Fishing the lakes. Those hunting trips. Backcountry horse rides. Four-wheeling the dunes. Winter's sports. Visiting friends in the country. Whatever your outdoor passions, a Lance camper can make memories that last lifetimes.

**If you're in the market for an RV – and you're trying to decide among motorized, towable, or truck camper – here are some very practical considerations: Purchase price far less than a motorhome. Lower total cost of ownership (versus other RV's fuel, storage, registration, engine and transmission repairs, tires, insurance and depreciation). No storage costs – store at your house. Tow all your toys – boats, horse, cargo, motorcycle, snowmobile trailers. Ease in getting around. Highly maneuverable. Go anywhere a truck goes. Not limited to RV campsites. Better fuel economy. Less warranty and service issues. Easier to find techs and parts to work on a pickup truck than a motorhome chassis. Comfort behind the wheel. No need to get used to a new vehicle. No trouble backing-up. The most versatile RV. 3-in-1 combination: vehicle, camper, trailer.**

# little things

We use costly stainless steel and coated Everlube®

fasteners on our exteriors to help prevent corrosion – important in maintaining the like-new appearance and value of your camper investment. A small example of how little things make a big difference – and the careful attention to detail we invest in engineering quality products for you.

# Lance 1181

Top-of-the-line. A fabulously large dry bath, roll-out pantry and drawers, lots of counter space – and a full-wall slideout with double-door refrigerator, dinette and wardrobe. A huge insulated skylight and mirrored wardrobe complete the picture.

Waterfall interior with optional wraparound U-shaped sofa/bed

# Lance 1131

If you need the extra room for sleeping, the Lance 1131 is the floorplan for you. New for 2007, the 1131 is Lance's most spacious truck camper ever – sleeping up to seven – with plenty of room in the cabover, dinette, bunk and rear tent bed areas. Everything you need for those weekends with the kids and all the toys.

# 6 major ways Lance is Number 1

## BEST CAMPER DESIGN + ENGINEERING

No other camper manufacturer can match our 42 years' expertise and investment of capital in personnel, equipment, materials and technologies.

## BEST CAMPER CONSTRUCTION

Compare for yourself. Once you step in a Lance, you'll sense the difference. We're the innovators of LanceLock™ – the *only* system that *properly* and *securely* integrates aluminum-tubed framing together.

## BEST IN OWNER SATISFACTION

We believe in treating people fairly and we strive to do what's right. We're grateful to our many loyal Lance owners since 1965.

## BEST REPUTATION FOR QUALITY

Lance has received the prestigious DSI (Dealer Satisfaction Index) Quality Circle Award eight times. Only a handful of RV manufacturers make the grade.

## BEST FACILITIES

141,000 square feet on a 22-acre campus.

## BEST DEALER NETWORK

Dealers across the US and Canada – ready to serve you.

Perfect for people that prefer a non-slideout camper with larger floorspace, the Lance 1055 is a 10'11" camper with an oversized dry bath. Also, a food bar and abundant counter space not found in today's campers – until now. The 1055's basement design offers increased storage and holding tank capacities as well.

# Lance 1055

Waterfall interior with optional fold-down sofa/bed

living the  
**Lance**  
**life**

**Bill  
Huber**

Looking for a top-quality truck camper, but without a slide? The Lance 950 features a full basement for extra storage and tank capacities – and is forged from 42 years' experience by the best in the industry. Better built. 100% made-in-USA. Lance.

Lance  
**950**

PRCA Calf Roping Champion Bill Huber, wife Jackie, sons Justin and Cody (and several horses in-tow) have been living the Lance life for years – traveling over 250,000 miles to rodeos in their Lance.

"If that's not a testimonial as to Lance's quality and durability, well then, I don't know what is" says Bill. "And it's very comfortable and convenient to travel in, too" adds Jackie. "We love our Lance!"

# matching your truck + camper

Truck manufacturers provide consumers with certain ratings to help determine the capacities of the truck, as manufactured. Some of those ratings are posted on the door jam, a label in the glove box, or in the owner's manual.

If you already own a truck that you intend to use for a camper, it's always wise to take it to a commercial truck scale to determine the actual weight of the truck. That information - along with your truck capacity information - will help determine the remaining capacities for carrying and/or towing.

Camper weights - both dry and wet - vary depending on what optional equipment you've installed and how full your holding tanks are. Also take into consideration the weight of gear, passengers and trailer tongue (if applicable).

Truck and camper package handling can be greatly improved by the addition of support equipment like air bags, special truck shocks, and cabover shocks - outlined on page 30. Maintaining maximum tire pressure on quality tires with ratings equal to, or better than, your original tires is also important.

Because we're unfamiliar with your specific truck and how you intend to use it, Lance makes no warranties or representation - express or implied - as to the performance or reliability of your truck with a Lance camper.

For professional guidance, see your nearest Factory Authorized Lance Dealer. They're trained in properly calculating truck/camper packages.

Identical to the Lance 861's floorplan, the Lance 851 is the long bed version - suited for three-quarter-ton trucks. With a basement design providing generous storage and extra tank capacities, the 851 is an ideal rig for long bed trucks.

## Lance 851

# go any where

One of our most popular models, with a built-on bumper and step for easy access into the coach, the Lance 845 is a short bed truck owner's dream. The extended cabover with queen-sized bed is standard on both the Lance 845 and 835. And the front cabinets in the cabover bedroom area provide extra storage.

## Lance 845

Tired of rules and road signs that say 'no'? In a Lance, you can laugh them off. Go ahead. Take the roads all those motor-home and towable RVers can't navigate. Go to where the pavement ends and the great outdoor adventures begin - because anywhere a truck can go - you can go, too.

**Fact: Lance truck campers are the most maneuverable RVs available.**

# designed + built to last

On average, hundreds of man-hours and over 1700 components (many of them custom) go into building each Lance camper. We care about the quality of our products and invest the extra time, energy and engineering to ensure we consistently produce the best truck campers anywhere.

## LanceLock™

Lance-proprietary structural assembly process

Introduced in 2005 models, LanceLock is the method Lance uses to integrate their .060-aluminum-tubed frames together.

The reason it's called "Lance-Lock" is because of the specially made, interlocking aluminum extrusions (shown in red) - a Lance exclusive - delivering incredible strength and durability.

Our aluminum structural framing uses thicker, aircraft-grade .060-inch Alodine®-coated metal - welded within a precision jig system to ensure true-to-square, tight-tolerance assembly.

**.060" aluminum**

**Factory tours** are available on a limited, advance-reservation basis. Please call 661 949 3322 x319 for details.

Because of no overhang with the Lance 835, you can tow a large load without a hitch box extension. And with a dinette that converts into a bed - along with the standard overhead bunk - the 835 can very comfortably sleep five.

# Lance 835

**TPO roofs** All Lance models are made with seamless, marine-grade TPO (thermo-plastic polyolefin) roofs - a superior material usually reserved for high-line RV products.

# camper power

A camper's electrical system is attached to a power panel, which accepts both 12-volt DC and 110-volt AC current. When a camper is plugged into household current (110 volts AC) at a campground, a built-in converter changes AC current to 12 volts DC. Your camper's furnace fan, range hood, water pump and lights are all 12-volt DC appliances.

The power panel also distributes 110-volt power to the refrigerator, microwave and to the 110-volt AC outlets, so you can use virtually any household appliance. It also serves as a charger, keeping the camper battery fully energized for the times you're not plugged into a 110-volt power supply.

When you're on the road, the alternator in the truck can distribute power to both the truck battery and the camper

battery. The camper battery operates all the 12-volt appliances when the camper isn't plugged into a 110-volt source.

In many models, a propane-powered generator may be ordered. Just push the button and, in a few seconds, you'll have power to operate your microwave, air conditioner, or almost any other 110-volt AC appliance – plus power for the camper's built-in charging system.

Propane is the fuel that powers the range/oven, furnace, water heater, and, if installed, the generator. Refrigerators can be powered three ways – 12-volt DC, 110-volt AC, and propane.

Because your optional dealer-installed camper battery can be wired to the truck alternator, it will recharge while driving the truck. However, unless you're on-the-move (and that's not always practical) – **solar energy is a terrific way to keep your battery charged. With an optional 80-watt-output solar panel with built-in regulator, recharging your battery is silent, automatic and very practical.**

Lance factory-installed panels have a red LED indicator light conveniently located, indicating when the solar panel is producing power.

Solar panels are very useful in colder climates, where the furnace fan can draw down a battery in 24 to 48 hours.

**Your Factory Authorized Lance Dealer can answer any technical questions you may have about power in a Lance camper that's not covered in this overview.**

Optional solar panel

## Lance 805

The 805 is our smallest and lightest camper – designed especially for half-ton and import trucks. The floorplan is clean and simple. And with a light weight and light price, this rig is perfect for those quick, get-away weekends.

# Lance 805

**8'0" narrow-body non-self-contained camper designed for domestic F-150s and 1500s – and import trucks with a minimum width of 48" between wheel wells**

- Interior floor length 8'0"

FACTORY TRAINED  
Service

dealer-installed  
equipment

Installation of these support equipment systems by your Factory Authorized Lance Dealer is highly recommended to ensure you receive **The Ultimate Ride**. Experience a dramatic improvement in the drivability and handling of your truck and camper package – in any weather, on any road.

ASA's rear-view camera/monitor maximizes safety

2

When not towing loads that require an extended hitch, included in Reese's Titan system is a reducer sleeve, which you use to reconnect the hitch ball and draw bar to the receiver hitch.

1

Lance-exclusive cabover shocks have quick-release stainless steel connectors

Happijac Qwik-Load™ turnbuckle upgrades make anchoring your camper a snap

4

Within Air Lift's Super Duty air bags are the Lance-exclusive internal jounce bumpers

5

- 1 Reese Titan™ Class V hitch/extension system increases your towing capabilities over a stock factory hitch.
- 2 ASA rear-view camera/microphone and in-cab monitor lets you see – and hear – what's behind you.
- 3 Happijac frame-mount anchoring system and centering guides assist with center alignment within the bed.
- 4 Happijac front and rear turnbuckles safely and securely attach and anchor the camper to your truck.
- 5 Air Lift Super Duty™ air bags increase stability and levels the rig by transferring rear axle load forward.
- 6 Rancho RS-9000X™ front and rear shocks greatly improve ride in all weather and road conditions.
- 7 Air Lift Air-On-Demand™ in-cab control controls the compressor and pressure for the air bags and shocks.
- 8 Lance Custom Design™ cabover shocks reduce the impact of up-and-down motion from irregular roads.

# One of the many advantages of choosing a Lance truck camper as your RV is the ability to tow all your toys

When towing behind a Lance camper, extending the hitch from the truck rearward to the camper bumper is necessary.

The method Lance recommends involves a truck-mounted Class V receiver hitch and hitch box extension (as detailed in the 3-D view photos on the dealer-installed equipment section on the opposite page). A draw bar with hitch ball is inserted into the hitch box extension, the same way it would be inserted into the receiver hitch itself.

**Reese manufactures the Titan Class V receiver hitch and hitch box extension specifically for truck camper applications. It replaces standard factory-stock receivers, which don't accept hitch box extensions.**

The other important benefit is that the Reese Titan Class V system doesn't require you to attach the receiver hitch or hitch box extension to the camper. The hitch box extension can be in place when loading or unloading your camper. For very heavy loads, the hitch box extension in combination with a weight-equalizing hitch can be used. The chart at the right gives capacities for Reese's Titan Class V hitch box extensions.

Always observe your truck's tow ratings – and the advice of your Factory Authorized Lance Dealer. Their service teams have the knowledge, experience and skill to outfit your rig correctly.

## Capacities for Reese® Titan™ Class V heavy-duty hitch box extensions

	Weight carrying/ tongue weight	Weight distributing/ tongue weight	Length of cut extension
Lance 845 short bed			24"*
Lance 861 short bed			
Lance 915	6000 pounds/ 600 pounds	8000 pounds/ 800 pounds	
Lance 950			
Lance 981			
Lance 1055			41"*
Lance 1131	5000 pounds/ 500 pounds	7500 pounds/ 750 pounds	
Lance 1181			
Lance 1191			

A universal heavy-duty 48" factory-stock Reese extension is cut down by a technical service professional to a 24" or 41" length to fit your application.

\*Dealer modifications required. Consult your Factory Authorized Lance Dealer for professional technical advice and proper equipment installation. All weights, dimensions and capacities are approximate values – and subject to change without notice. All measurements are based on an 8 3/4-inch standard drop ball mount. Some capacities may vary depending on vehicle application. Be safe – always consult with your Factory Authorized Lance Dealer beforehand.

LCMC CERTIFIES 100% COMPLIANCE WITH ALL FEDERAL AND STATE ELECTRICAL, PLUMBING, HEATING AND FIRE SAFETY STANDARDS AS ESTABLISHED FOR RECREATIONAL VEHICLES AS A MEMBER IN GOOD STANDING WITH RVIA (RECREATION VEHICLE INDUSTRY ASSOCIATION).

Lance truck campers 2007

the new Lance  
**sports  
camper**

a truck camper RV  
designed for the serious  
outdoor enthusiast

**Lance**

**SportsCamper**

## If you own a truck, you're halfway to owning an RV

Since 1965, Lance has been the #1 truck camper manufacturer in North America - and now there's a new series of campers designed exclusively for people who enjoy serious outdoor adventures like hunting, fishing and practically any outdoor sport: the Lance SportsCamper. No more motels or restaurants...just stay where you play.

The Lance SportsCamper, fully self-contained, turns your full-sized pickup into the most versatile RV on the planet. Go anywhere, do anything, anytime - with the ability to tow all your toys while enjoying a maneuverability no other RV can match! And all Lance campers are easy to load and unload.

### Everything you need to get out and stay where you play

Each model features a roomy interior complete with all the conveniences and comforts you'd expect from a top-quality RV, but with extras specially made for outdoorspeople in the field - a bed that converts between super queen and twin sizes, high-BTU forced-air furnace, lockable storage for firearms or gear, outdoor-patterned bed covers, and an oversized wardrobe for bulky clothes. And special options, too.

## Lance 8SCS
